

# Glenellen Solar Farm

## Construction Update

29 August 2025

It's hard to believe we're already in September, and with the transformer now delivered, work on the solar farm is still progressing well.

### Works completed or in progress

- Substation work continues
- 100% of panels installed
- 100% of trackers completely assembled
- 100% of inverters are on site
- There are still approximately 120 people working on-site
- HV (High Voltage) Trenching continues, now at 80%
- All Electrical Buildings onsite

### Upcoming works on site

- Substation works continue
- Trenching & DC cabling is ongoing
- Expected to Energize Transformer in September.
