

Glenellen Solar Farm

Construction Update 29 September 2025

It's football finals season and the Glenellen Solar Farm is also entering the final stages of construction — with energization just around the corner, crews are powering through the downhill run to completion.

Works completed or in progress

- 100% Substation built
- 100% of panels installed
- 100% of trackers installed
- 100% of inverters installed
- Approximately 100 people working on-site
- All Electrical Buildings onsite

Upcoming works on site

- Energization of solar farm expected in October
